## Profile

I am a self-taught web developer seeking my first position in technology. I have always been one to take on challenges, seek solutions, and gain knowledge in the process. Spending most of my professional career in hospitality management taught me countless lessons in conflict resolution, team training, and client satisfaction.

## Experience

### WEB DEVELOPMENT | INDEPENDENT STUDY | 2020-PRESENT

- I have spent hundreds of hours in Udemy Course work for MERN Stack development, exploring JavaScript libraries and documentation, building responsive landing pages, and simple web applications. I have learned how to use CRUD operators in web applications for building schemas in MongoDB for storing data for projects. I have made use of API's for displaying information in personal projects. I have used Heroku and Netlify for deployment after building out projects.

### SERVICE INDUSTRY | VARIOUS ROLES | 2006-2020

- Over the course of an extensive career in food and beverage, I have worn many hats, from waiting tables on cruise ships to managing music venues at popular social spots. I have hired and trained numerous individuals. I spent the years constantly learning about different and unique spirits, wines, and beers from all over the world. I conducted meetings with my management team regarding safety issues, spirits training, service technique, and monthly financial reviews of the business to suggest improvements. I performed start and end of day financials for many establishments including recording and dispersing tips to staff. I was responsible for making and receiving weekly orders based on business forecasts, writing schedules, and supervising shifts to ensure proper service. I would be happy to provide role details if interested in referrals or visit my [LinkedIn](#) profile.

## Education

**ASSOCIATES OF ARTS – PHOTOGRAPHIC, FILM, AND VIDEO TECHNOLOGY | YAVAPIA COLLEGE, SEDONA, ARIZONA**

**HIGH SCHOOL DIPLOMA | JOHN MARSHALL HIGH SCHOOL, SAN ANTONIO, TEXAS**
